
IDENTIFICATION

Welcome to the Santos Dumont English Assessment. I am (name) and this is (name). (He/she) will not interact with us during the test.

- 1) Please tell me your full name.
- 2) Please sign here the same way you signed your ID. Remember to make sure your signature in SACI is the same, and also that your photo is recent.
- 3) May I see your pilot's license and your ID? **State ANAC'S CODE** (Thank you)
- 4) Do you have any electronic devices with you?
- 5) Look at the camera, please. (Thank you)

The test has four parts. It takes approximately thirty minutes. Responses should be immediate, appropriate and informative. During the test, if you don't understand an instruction or question, please ask me for clarification. Are the instructions clear?

PART 1: AVIATION TOPICS

Part One: "Aviation Topics". In this part, you have to answer questions related to aviation. You should take approximately one minute to answer each question and I will tell you when to stop if necessary.

- 1) Tell me about your first flight. How was it?
- 2) What is the difference between V1 and V2?
- 3) How will avionics technology be improved in the future?

Possible follow- up questions to be asked if necessary:

Can you say that once again, please?
Can you tell me a little bit more about that?
Can you give me an example/or some examples?
Why? / Why not? / How?

Thank you. That is the end of Part One. Let's now move on to Part Two.

PART 2: INTERACTING AS A PILOT

Part Two: “Interacting as a Pilot”. In this part you have to interact with the Air Traffic Control in five different situations. You may ask the controller to say again once (and you will not be penalized for that). After listening to the controller, you should interact as the pilot. **All information is important.**

You are the pilot of a twin-engine aircraft. **Your call sign is ANAC 123.**

Please put the headphones on. Let’s check the volume.

AUDIO CHECK

Situation 1) You are at Juiz de Fora Airport. Listen to Juiz de Fora Tower and read back.

01

ANAC 123, [CLEARED TO ENTER RUNWAY 20] AND BACKTRACK] [REPORT READY FOR TAKEOFF] [3]

Minimum Interaction: “Anac 123, roger. Cleared enter RWY 20 and backtrack. We will report ready for takeoff”.

Now, during taxi, your chief purser advises you that an unaccompanied child is having an epileptic seizure. Contact Tower, report you situation and request medical help. Then interact appropriately.

Minimum interaction: “Juiz de Fora Ground, we have a medical emergency here. An alone kid is having an epileptic seizure. We need to go back to the apron and we request an ambulance, ANAC 123.”

02

ANAC 123, [YOU ARE CLEARED TO EXIT THE RUNWAY BY DELTA] [TO THE PARKING AREA] [AN AMBULANCE WILL BE PROVIDED] [CONFIRM IF THE PASSENGER IS UNDER 18]. [3]

Minimum interaction: “AFFIRM. It is a kid. We will leave the runway by Bravo to the parking area, Anac 123.”

What did the controller say?

Minimum interaction: “The controller told me to.... and asked me to confirm if....”

Thank you. Now, situation number 2.

Situation 2) You are ready to taxi at Heathrow Airport. Listen to Heathrow Ground and read back all information.

03

ANAC 123, [TAXI APPROVED TO RUNWAY 27 LEFT] [VIA BRAVO AND ALFA 13] [CAUTION DUE TO WORK IN PROGRESS ON THE GRASS MARGIN]. WHEN REACHING HOLDING POINT [CONTACT TOWER ON 112.35] [4]

Minimum interaction: "ANAC 123, taxi approved via..."

Now due to the long wait, you notice you are below the minimum required fuel you have to refuel. Call Tower, tell them about your problem and say intentions. Then listen to the ATC and interact.

Minimum interaction: "Heathrow Tower, ANAC 123. We need to return to the gate in order to refuel..."

04

ANAC 123, ROGER, [ENTER RUNWAY 27] AND [VACATE VIA A13 AND BRAVO]. [EXPEDITE YOUR TAXI] [CONFIRM YOU HAVE PROBLEMS WITH FUEL LEAKING] [4]

Minimum interaction: "NEGATIVE, we have to refuel to avoid lack of fuel, not fuel leaking, ANAC 123."

What did the controller say?

Minimum interaction: "The controller asked me to confirm if...and he told me...."

Thank you. Now situation number 3.

Situation 3) You are going to depart from Atlanta International Airport. Listen to Atlanta Ground and read back all information.

05

ANAC 123, [YOU ARE CLEARED TO TAXI VIA BRAVO AND BRAVO CHARLIE] [TO RWY 09 CENTRAL] GIVE WAY TO AN AIRBUS 380 LEAVING DELTA 7] [EXPECT 30 MINUTE DELAY FOR TAKEOFF] [ALTIMETER SETTING 1021]. [5]

Minimum interaction: "Anac 123, cleared to taxi via Bravo and BC to rwy 09 central..."

Now, while taxiing, you observe some liquid leaking from the Airbus in front of you. It seems to escape from the landing gear. Report it to the ATC. Then interact appropriately.

Minimum interaction: *Atlanta Ground, we can see a liquid coming out from the Airbus in front of us. It looks like hydraulic fluid from the landing gear, ANAC 123."*

ANAC 123, [HOLD POSITION] CONFIRM YOU NOTICE HYDRAULIC FLUID COMING OUT FROM YOUR LANDING GEAR. [2]

Minimum interaction: *"ANAC 123, NEGATIVE, the liquid is from the airbus A380 ahead of us."*

What did the controller say?

Minimum interaction: *"The controller asked to confirm if...and she told me to...."*

Thank you. Now situation number 4.

Situation 4) You are under vectoring by Empire Control. Listen to the ATC and read back.

ANAC 123, [RADAR CONTACT] [DESCEND TO 10 THOUSAND FEET] [KEEP PRESENT HEADING] [REPORT REACHING 8 THOUSAND FEET] [EXPECT TO LAND ON RUNWAY 30] [5]

Minimum interaction: *"Empire Control, roger, descend to... Anac 123".*

Now, during the descent, you see this on your right, at 2 o'clock. Call Empire Control, report the situation and ask to deviate. Then, listen to the controller and interact.

Minimum interaction: *Empire, there is a huge hot air balloon close to our position. We need to deviate to the left.*

08 ANAC 123, [TURN LEFT HEADING 180] [COULD YOU CONFIRM THERE IS A BALLOON AT 2 O'CLOCK?]

Minimum interaction: *"ANAC 123, AFFIRM, the balloon is to our right, at 2 o'clock. We are now heading 180 turning left, Anac 123."*

What did the controller say?

Minimum interaction: *"The controller asked to confirm if...and she told me to...."*

Thank you. Now situation number 5.

Situation 5) You have just taken off to Salvador. Listen to Salvador Control and read back.

ANAC 123, [AIRBORNE AT 15] [CLIMB TO THREE THOUSAND FEET] [FLY HEADING TINO VORTAC] [SPEED AT YOUR DISCRETION] [4]

Minimum interaction: *"Roger, climbing to 3,000 ft heading (TINO) VORTAC, speed at our discretion, ANAC 123."*

Now, after takeoff, this happens to you. Call Salvador Control, explain the situation and say your intentions. Then, listen to the controller and interact.

Minimum interaction: *“Salvador Control, ANAC 123. We lost our GPS navigation. We need... ANAC 123 ”*

ANAC 123, [I UNDERSTOOD YOU HAD A GPWS FAILURE] [TRANSMISSION IS POOR] [DO YOU HEAR ME LOUD AND CLEAR?]. [4]

Minimum interaction: *“Salvador Control, NEGATIVE, we have lost our GPS. We read you (1 to 5), ANAC 123.*

What did the controller say?

Thank you. That is the end of Part 2. Let's move on the third part of the test.

PART 3 – UNEXPECTED SITUATIONS

Part Three: “Unexpected Situations”. In this part of the test, you will listen to three different communications between pilots and air traffic controllers. The recordings will be played twice. There is a five-second pause before the recording is repeated. After listening to the recording, you should tell me everything that the pilot and the controller said. I will then ask you a question.

At the end of Part 3, I will ask you to compare the three situations, so please take notes.

Do you have any questions?

Situation 1) Listen to Situation number One:

ATC: LUFTHANSA 571, [WE'VE BEEN INFORMED YOU STARTED AN EMERGENCY EVACUATION PROCEDURE]. [PLEASE CONFIRM IF YOU NEED ASSISTANCE]. [2]

PILOT: GROUND, [THE SLIDES WERE DEPLOYED BY MISTAKE]. [EVERYTHING IS UNDER CONTROL]. [WE DON'T NEED ASSISTANCE]. [PASSENGERS ARE ALL SAFE]. LUFTHANSA 571.

Now tell me, in your own words, everything that the pilot and the controller said.

Why are escape slides accidentally deployed? Explain it.

Situation 2) Listen to Situation number two:

PILOT: [MAYDAY MAYDAY MAYDAY], MIAMI CONTROL, N0CFT7 [ON FIRE]. [WE BELIEVE IT'S COMING FROM THE AIR CONDITIONING SYSTEM]. [REQUEST IMMEDIATE RETURN].

ATC: N0CFT7, ROGER MAYDAY. [CLEARED TO RETURN TO FORT LAUDERDALE AIRPORT]. [FIRE BRIGADE WILL BE ACTIVATED]. [EXPECT ILS APPROACH TO RUNWAY 05 RIGHT].

Now tell me, in your own words, everything that the pilot and the controller said.

In what circumstances pilots might face fire onboard? Give some examples.

Situation 3) Listen to Situation number three:

PILOT: MANAUS CENTER, SPANISH AIR 091. [WE REQUEST IMMEDIATE DESCENT TO A SAFE ALTITUDE]. [WE HAD AN ALERT OF SUDDEN DEPRESSURIZATION]

ATC: SPANISH AIR 091, ROGER. [STATE PERSONS ON BOARD] AND [HOW MUCH FUEL YOU HAVE]. [WE ARE CLEARING OUT THE TRAFFIC].

Now tell me, in your own words, everything that the pilot and the controller said.

Wait for interaction

How could technology prevent decompression? And why pilots need to reach a safe altitude?

Now, considering the three situations you heard in part 3:

- How would you compare them? You may want to compare them in terms of severity, possible solutions and ways of prevention. Which one do you think is the most difficult to deal with? Why?

Thank you. That is the end of Part Three. Let's move on to the last part of the test, part four.

PART 4 – PICTURE DESCRIPTION AND DISCUSSION

In this part, you will tell me what you can see in this picture (show the picture to the test taker) and what you think is happening in it. After that, I will ask you some questions. (Pause) Look at the picture carefully. You may take a few moments to think before you start talking.

Are instructions clear?

Wait for interaction

1	Please describe this picture to me. If necessary: -What do you think was happening when this picture was taken? / What's happening?
2	Choose one: What do you think happened before this picture was taken?; or What do you think these people were doing before this picture was taken? What do you think was happening before this picture was taken? Can you create a short story based on this picture? Use your imagination.
3	Imagine that this picture has just been taken: What do you think will happen next?

4) What actions would you take if your airplane was in a similar situation?

Rephrase, if necessary:

How would you handle this situation?

5) What kind of technology helps pilots avoiding volcanic ash?

Rephrase, if necessary:

How can pilots avoid volcanic ash?

6) "Facing a cloud of volcanic ash at night is much worse because you can not see it."

To what extent do you agree or disagree with this statement?

Rephrase, if necessary:

How much do you agree with this statement: it's very hard
to identify volcanic ash clouds during night flights.

Ok, thank you! So this is the end of the test. Thank you very much for coming.

END OF THE TEST
