

IDENTIFICATION

Welcome to the Santos Dumont English Assessment. I am (name) and this is (name). (He/she) will not interact with us during the test.

- 1) Please tell me your full name.
- 2) Please sign here the same way you signed your ID. Remember to make sure your signature in SACI is the same, and also that your photo is recent.
- 3) May I see your pilot's license and your ID? **State ANAC'S CODE** (Thank you)
- 4) Do you have any electronic devices with you?
- 5) Look at the camera, please. (Thank you)

The test has four parts. It takes approximately thirty minutes. Responses should be immediate, appropriate and informative. During the test, if you don't understand an instruction or question, please ask me for clarification. Are the instructions clear?

PART 1: AVIATION TOPICS

Part One: "Aviation Topics". In this part, you have to answer questions related to aviation. You should take approximately one minute to answer each question and I will tell you when to stop if necessary.

- 1) How was the beginning of your career in aviation?
(If necessary: **How was your flight training to become a pilot?**)
- 2) How do you get ready to fly early in the morning?
(If necessary: **What is your routine for an early flight?**)
- 3) How can companies help to improve flight safety?
(If necessary: **Do you think aviation will be safer in the near future? Why (not)?**)

Possible follow- up questions to be asked if necessary:

Can you say that once again, please?
Can you tell me a little bit more about that?
Can you give me an example/or some examples?
Why? / Why not? / How?

Thank you. That is the end of Part One. Let's now move on to Part Two.

PART 2: INTERACTING AS A PILOT

Part Two: "Interacting as a Pilot". In this part you have to interact with the Air Traffic Control in five different situations. You may ask the controller to say again once (and you will not be penalized for that). After listening to the controller, you should interact as the pilot. **All information is important.**

You are the pilot of a twin-engine aircraft. **Your call sign is ANAC 123.**

Wait for 3 seconds for test taker to take notes if necessary.

Please put the headphones on. Let's check the volume.

AUDIO CHECK

Situation 1) You are holding short of runway 02 right at San Diego Airport in the United States. Listen to San Diego Tower and read back.

Wait for 3 seconds for test taker to take notes if necessary.

01

ANAC 123, [CLEARED TO LINE UP AND TAKEOFF IMMEDIATELY FROM RUNWAY 02 RIGHT], WIND 030 DEGREES AT 15 KNOTS,[WHEN REACHING 5 THOUSAND FEET] [CONTACT DEPARTURE ON 126.20] [3]

Minimum Interaction: "Anac 123, roger. Cleared for immediate takeoff RWY 02 right. When reaching 5.000 feet will contact control on 126.20".

If the candidate did not interact with ATC as the pilot:

You are supposed to interact as if you were the pilot.

If the candidate asks for a second repetition:

You can only ask for one repetition.

Now, during takeoff roll, you notice that your speed indication was unreliable, and because of that you had to reject takeoff. Inform San Diego Tower about the situation and request return to the hangar. Then interact appropriately.

Minimum interaction: *"San Diego tower, we had a problem with the airspeed indicator / unreliable / defective / erroneous info / inaccurate data..."*

ANAC 123, [YOU ARE CLEARED TO EXIT THE RUNWAY] [CONFIRM IF YOU INTEND TO TAKEOFF AGAIN LATER]. [3]

Minimum interaction: *"NEGATIVE. We request to return to the hangar to undergo a maintenance check, we are now exiting / vacating the runway, Anac 123."*

What did the controller say?

Minimum interaction: *"The controller told me to.... and asked me to confirm if...."*

Thank you. Now, situation number 2.

Situation 2) You are going to land at Bristol Airport. Listen to Bristol Approach and read back all information.

ANAC 123, BRISTOL APPROACH [DESCEND TO FLIGHT LEVEL 140] [HEADING 280 DEGREES] [ALTIMETER SETTING IS 1019]. [3]

Minimum interaction: *"ANAC 123, descending to FL 140, heading 280 degrees, QNH 1019."*

Now Control ordered you to hold over Bristol VOR for 20 more minutes. You have realized you are about to face a fuel shortage. Contact Bristol Approach and inform them about your situation. Then listen to the ATC and interact.

Minimum interaction: *"Bristol Approach, ANAC 123. We are not able to keep holding. We are about to face a low fuel situation (fuel depletion / exhaustion/ lack of fuel)..."*

ANAC 123, WE WILL GIVE YOU PRIORITY TO LAND, [EXPECT VECTORS TO RUNWAY 27 RIGHT] [PROCEED DIRECT TO AVEC VOR] [FLIGHT LEVEL 080] [CONFIRM YOU ARE RUNNING LOW ON FUEL] [4]

Minimum interaction: *"AFFIRM, we are unable to hold due to fuel shortage, flying direct to VOR, descending to FL 080, expecting vectors to RWY 27, ANAC 123."*

What did the controller say?

Minimum interaction: *"The controller asked me to confirm if...and he told me...."*

Thank you. Now situation number 3.

Situation 3) You are going to depart from Dubai International Airport. Listen to Dubai Ground and read back all information.

05

ANAC 123, [YOU ARE CLEARED TO TAXI VIA BRAVO] [TO RWY 12 RIGHT] [MAINTAIN POSITION ON BRAVO] [EXPECT BACKTRACK] [ALTIMETER SETTING 1015].

Minimum interaction: *"Anac cleared to taxi via Bravo to rwy 12..."*

Now, right after takeoff, an annunciator light turns on showing that you have an open door. You also notice that you are losing pressure and, as a consequence, you must return. Inform Dubai Tower about this situation and say you need to burn or dump some fuel to reduce landing weight. Then interact appropriately.

Minimum interaction: *PAN PAN (x3), Dubai Tower, ANAC 123. We have an open door and we are losing pressure. We need to burn or dump some fuel before landing."*

06

ANAC 123, ROGER PAN PAN [SQUAWK 7700] [CONFIRM YOU ARE DEPRESSURIZING] [YOU ARE CLEARED TO LAND ON RUNWAY 30 LEFT].

Minimum interaction: *"ANAC 123, NEGATIVE, we must burn some fuel before landing. 7700 on transponder."*

What did the controller say?

Minimum interaction: *"The controller asked to confirm if...and she told me to...."*

Thank you. Now situation number 4.

Situation 4) You are ready to taxi at Ezeiza Airport in Buenos Aires. Listen to Ezeiza Ground and read back.

07

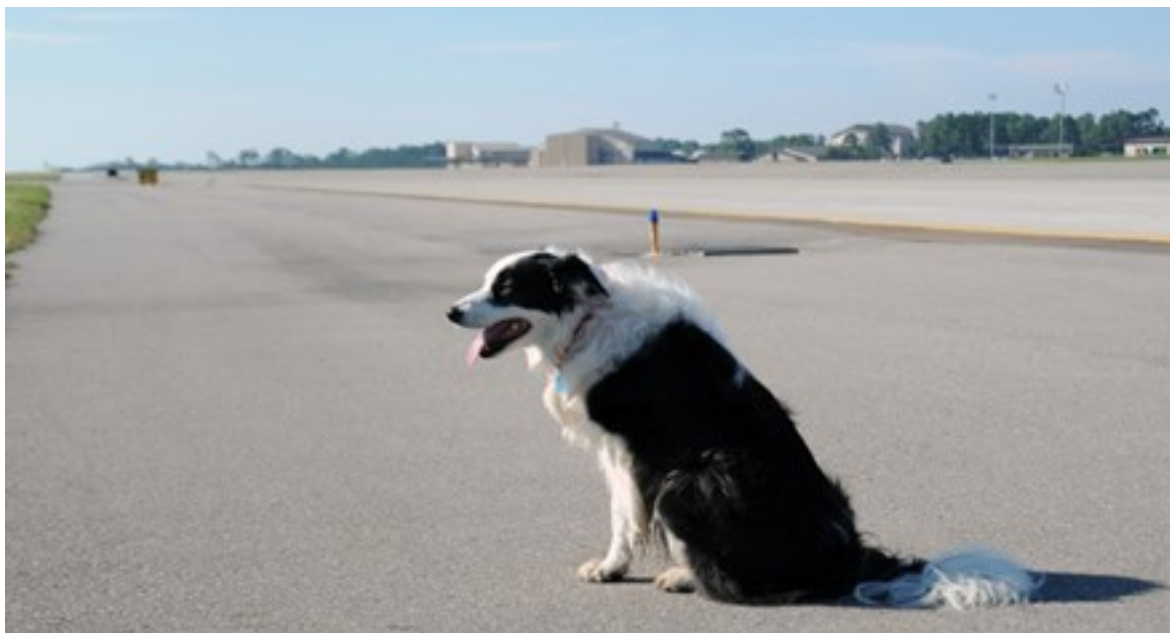

ANAC 123, [TAXI VIA ROMEO AND ALFA] [GIVE WAY TO AN AIRBUS 330 LEAVING GATE 01] [AT HOLDING POINT RUNWAY 17] [CALL EZEIZA TOWER ON FREQUENCY ONE TWO FIVE DECIMAL SIX ZERO] [4]

Minimum interaction: *"Ezeiza Tower, roger, taxi to... tower on 125.6, Anac 123".*

If the candidate did not interact with ATC as the pilot, tell him to do so:

You are supposed to answer the controller as if you were the pilot.

Now, while taxiing, you see this situation **(show the picture to the test taker)**. Call Ezeiza Ground and say your intentions. Then, listen to the controller and interact.

Minimum interaction: *Ezeiza Ground, ANAC 123. We need to stop taxiing because there is a dog in front of us.*

08

ANAC 123, [I READ YOU 3] [MAINTAIN POSITION] [CONFIRM IF YOU NEED TO DEVIATE TO THE RIGHT DUE TO A FOD]

Minimum interaction: *"ANAC 123, NEGATIVE, we need to stop due to a dog in front of us, Anac 123.*

What did the controller say?

Minimum interaction: *"The controller asked to confirm if...and she told me to...."*

Thank you. Now situation number 5.

Situation 5) You are preparing for takeoff from Santos Dumont Airport. Listen to Santos Dumont Tower and read back.

09

ANAC 123, [CLEARED FOR TAKEOFF FROM RUNWAY 20 LEFT] [TURN LEFT AFTER TAKEOFF] [CLIMB TO SEVEN THOUSAND FEET] [CONTROL ON FREQUENCY 132,75] [WIND IS CALM][5]

Minimum interaction: *"Cleared for takeoff rwy 20L, left turn, climb to 7,000 ft, control on 132,75, Anac 123".*

Now, after takeoff, this happens to you. Because of this situation, you have decided to divert to Galeao Airport. Call Rio Approach, explain the situation and say your intentions. Then, listen to the controller and interact.

Minimum interaction: *"Rio Approach, ANAC 123. Our windshield is cracked / damaged. Request diversion to Galeao Airport. "*

10

ANAC 123, [I'LL GIVE YOU PRIORITY TO LAND AT GALEAO AIRPORT] [TURN RIGHT HEADING TWO FIVE ZERO]. [EXPECT LANDING ON RUNWAY ONE ZERO] [CONFIRM YOU HAVE A CRACKED WINDSHIELD]. [4]

Minimum interaction: *"Rio Approach, AFFIRM, our windshield is damaged. Turning right heading 250, expecting RWY 10 at Galeao Airport, ANAC 123.*

What did the controller say?

Thank you. That is the end of Part 2. Let's move on the third part of the test.

PART 3 – UNEXPECTED SITUATIONS

Part Three: "Unexpected Situations". In this part of the test, you will listen to three different communications between pilots and air traffic controllers. The recordings will be played twice. There is a five-second pause before the recording is repeated. After listening to the recording, you should tell me everything that the pilot and the controller said. I will then ask you a question.

At the end of Part 3, I will ask you to compare the three situations, so please take notes.

Do you have any questions?

Situation 1) Listen to Situation number One:

PILOT: PAN PAN, PAN PAN, PAN PAN, MIAMI CENTER, PT-CFT. WE HAVE SUFFERED AN UNEXPECTED SEVERE TURBULENCE AT FL350. SOME PASSENGERS HAVE GOTTEN INJURED. WE REQUEST AN EMERGENCY LANDING AT MIAMI AIRPORT AND MEDICAL ASSISTANCE ON THE GROUND.

ATC: PT-CFT, ROGER. YOU ARE CLEARED FOR LANDING ON RUNWAY 26 RIGHT.

Now tell me, in your own words, everything that the pilot and the controller said.

What can a severe turbulence cause to the structure of an aircraft and to the passengers? Explain it.

Situation 2) Listen to Situation number two:

ATC: N07FT. WE'VE RECEIVED AN ANONYMOUS PHONE CALL SAYING YOU HAVE A BOMB ON BOARD. NO MORE INFORMATION WAS GIVEN. SAY INTENTIONS.

PILOT: BRASILIA CENTER, N07FT. WE REQUEST IMMEDIATE RETURN TO MIAMI AIRPORT. REQUEST VECTORS FOR PRIORITY LANDING. WE REQUEST POLICE ENFORCEMENT ON THE GROUND.

Now tell me, in your own words, everything that the pilot and the controller said.

What changed in aviation after September 11th?

Situation 3) Listen to Situation number three:

PILOT: MAYDAY MAYDAY MAYDAY, FRANKFURT CONTROL. SKYWEST 97, WE HAVE AN UNCONTROLLABLE FIRE IN THE ENGINE NUMBER 2. WE DON'T HAVE ENOUGH POWER TO REACH THE RUNWAY. WE ARE GOING TO PERFORM AN EMERGENCY LANDING.

ATC: SKYWEST 97. SAY YOUR POSITION. I AM WARNING THE EMERGENCY SERVICES ON THE GROUND.

Now tell me, in your own words, everything that the pilot and the controller said.

Wait for interaction

How could technology prevent engine fire?

Now, considering the three situations you heard in part 3:

- How would you compare them? You may want to compare them in terms of severity, possible solutions and ways of prevention. Which one do you think is the most difficult to deal with? Why?

If the candidate doesn't explain why:

Why? / Why not?

When necessary:

Could you compare them?

Thank you. That is the end of Part Three. Let's move on to the last part of the test, part four.

PART 4 – PICTURE DESCRIPTION AND DISCUSSION

In this part, you will tell me what you can see in this picture (show the picture to the test taker) and what you think is happening in it. After that, I will ask you some questions. (Pause) Look at the picture carefully. You may take a few moments to think before you start talking.

Are instructions clear?

Wait for interaction

1	Please describe this picture to me. If necessary: -What do you think was happening when this picture was taken? / What's happening?
2	Choose one: What do you think happened before this picture was taken?; or What do you think these people were doing before this picture was taken? What do you think was happening before this picture was taken? Can you create a short story based on this picture? Use your imagination.
3	Imagine that this picture has just been taken: What do you think will happen next?

4) What actions would you take before landing if you faced a similar scenario?

Rephrase, if necessary:

How would you handle this situation?

5) What are the biggest difficulties regarding safety during an evacuation?

Rephrase, if necessary:

What are the main problems during an evacuation process?

6) Airline companies should constantly invest in flight crew training to deal with emergency situations.

To what extent do you agree or disagree with this statement?

Rephrase, if necessary:

How much do you agree with this statement: to improve safety, companies should train flight crew to deal with emergencies.

Ok, thank you! So this is the end of the test. Thank you very much for coming.

END OF THE TEST
